The Global Issues Lectures*

*This book mainly introduces the concepts and approaches of global governance from the viewpoints of Chinese and Russian scholars and is divided into four parts. The first one deals with the concept of a new type of global governance, namely “Globalization 2.0”. The second one is dedicated to institutions and multilateralism, including the importance and effectiveness of international institutions. The third part focuses on the important countries and regions in the new era, as well as such issues as the current global status quo, processes in Eurasia, the prospects of the U.S. – China – Russia trilateral relationship. The last part analyzes the future development of global governance and possible solutions of how it might be improved. Climate change, digital era, cyber security, financial and economic regimes, COVID-19 are all involved in this part. In short, this book is a profound and cutting-edge research on global governance. Extensively revised and updated, the new Fourth Edition of *Global Issues: An Introduction* offers a unique approach to the most important environmental, economic, social, and political concerns of modern life. Revised and updated to reflect the latest global developments Examines the most*

important environmental, economic, social, and political concerns of modern life The only book of its kind to use the concept of development to illustrate how different global issues are interrelated Includes a new section on nuclear energy Chapter boxes examine ways that individuals can have a positive impact on the issues examined within the text Key features include a glossary of terms; guides to further reading, media, and Internet resources; and suggestions for discussing and studying the material Although the current plight of children in many parts of the world can leave us with a grim outlook on the future, there are still many positive indicators of a better future for all. Local Childhoods, Global Issues is an interdisciplinary textbook that examines children's lives across the world, exploring the great differences—and similarities—between childhood experiences across different cultural contexts. The contributors consider the problems caused by poverty, social inequality, ill health, and violence, but they emphasize that these are challenges for children everywhere—not just those in the poorer countries of the world. They look at how children use their own resources and coping strategies and the sense of agency that results, arguing that in fact very few children are passive victims helplessly awaiting rescue. The contributors prominently feature interviews that highlight the direct perspectives of children themselves. Global Issues is a pedagogically rich text that offers a unique way of looking at contemporary issues, such as food security and global conflict, from a cross-cultural and multidisciplinary perspective. By

exploring each issue in depth, students gain an applied understanding of more abstract concepts like conflict, globalization, culture, imperialism, human rights, and gender, while the cross-cultural approach encourages students to view the world from outside the Western box. Designed for introductory-level students in global and international studies, human geography, anthropology, sociology, and development studies, this highly accessible text offers instructors and students a unique way of matching the concepts they learn in the classroom with important issues in the world in which they live and work. Global Issues in the Context of Spaces examines globalization using the concept of space to contextualize discussion of global issues. The manuscript uses the concept of space to contextualize global issues because spaces are the theater of human activity. Global issues result from specific dynamics emerging between people and their activities within specific spaces. The growth of population, the increase of human activity, and the usage of new spaces explain the complexity and challenges of global issues today. Environmental policy is often practiced reactively with each crisis addressed as an isolated event. Focusing on development of proactive policies, Global Environment Policy: Concepts, Principles, and Practice provides the essential scientific and socioeconomic framework for formulating pragmatic and comprehensive environmental policies. It discusses topics of interest to American and international audiences. Beginning with basic concepts, the book proceeds successively on to more advanced principles, theories, and practices for developing and

implementing comprehensive environmental policy solutions. Topics are introduced in a logical, yet connected, user-friendly manner. Using practical case studies and examples, the book illustrates both the power and limitations of theoretical approaches. It defines the scope and nature of the environmental policy problem, outlining its origins and evolution, and introduces the policy frameworks of the United Nations, European Union, and the United States. Each chapter begins with a case study and ends with a problem set; the questions are designed to elicit practical and critical thinking. The book ends with two capstone problems that exemplify nearly every major topic and aspect presented in this book. Upon completion, students should possess the competency required to examine a real world problem, evaluate it in terms of the concepts, principles, and tools described throughout the book, and develop a practical policy solution for resolving that problem.

Personal Finance, 2nd Edition offers essential skills and knowledge that will set students on the road to lifelong financial wellness. By focusing on real-world decision making, Bajtlesmit engages a diverse student population by helping them make personal connections that can immediately impact their current financial situations. Using a conversational writing style, relatable examples and up-to-date coverage on important topics like student debt, students gain the knowledge they need to avoid early financial mistakes. By the end of the course, students have identified their goals and developed the problem-solving skills they need to build on as they progress to the next stages of life. This first Handbook in a series

of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives. Matters related to urban densification, population mobility, urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice. Urban policy covers a vast field. This first volume combines chapters covering three broad themes: policy issues pertaining to the spatial aspects of the city; social and mobility issues; and issues of urban governance. The spotlight initially falls on urban structure, urban densification, the disappearing urban/rural divide, the urban economic landscape and the transformation of socialist economies. The Handbook then goes on to focus on migration, social mobility, crime, terrorism and social inequality. Finally, urban sustainability and urban governance come under the spotlight. Integration of the planning process, flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook. Books of this nature are often slanted in one particular direction: however, this Handbook's approach is different. Not only has the editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues – hence the volume's subtitle of 'contentious global issues'. As a Handbook, the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind. The Handbook will appeal to scholars and researchers of geography and urban and

development planning, demography and social science and environmental scientists for the focus on urban sustainability issues. The primary purpose of this book is to invite educators to (re)think what it means to critically conceptualize knowledge about the world. In other words, imagining curriculum in a critical way means decolonizing mainstream knowledge about global societies. Such an approach re-evaluates how we have come to know the world and asks us to consider the socio-political context in which we have come to understand what constitutes an ethical global imagination. A critical reading of the world calls for the need to examine alternative ways of knowing and teaching about the world: a pedagogy that recognizes how diverse subjects have come to view the world. A critical question this book raises is: What are the radical ways of re-conceptualizing curriculum knowledge about global societies so that we can become accountable to the different ways people have come to experience the world? Another question the book raises is: how do we engage with complexities surrounding social differences such as gender, race, ethnicity, religion, etc., in the global contexts? Analyzing global issues and events through the prism of social difference opens up spaces to advocate a transformative framework for a global education curriculum. Transformative in the sense that such a curriculum asks students to challenge stereotypes and engages students in advocating changes within local/global contexts. A critical global perspective advocates the value of going beyond the nation-state centered approach to teaching about topics such as history, politics,

culture, etc. It calls for the need to develop curriculum that accounts for transnational formations: an intervention that asks us to go beyond issues that are confined within national borders. Such a practice recognizes the complicated ways the local is connected to the global and vice versa and cautions against creating a hierarchy between national and global issues. It also suggests the need to critically examine the pitfalls of forming dichotomies between the local (or the national) and the global or the center and the periphery. This book compares and discusses a range of responses to managing global issues. The three channels that global issues flow through (public sector responses, private sector responses, and mixed public-private sectors) are explored in detail for undergraduate students, with lessons learned from the responses presented to enhance theory and practice.

Understanding the key IT issues facing firms within their surrounding contexts is critical for the firm, government, and their international counterparts. In response to the dominant and pervasive bias in Information Systems (IS) research towards American and Western views, the World IT Project was launched and is the largest study of its kind in the field. This book captures the organizational, technological, and individual issues of IT employees across 37 countries. The book enables management and staff to formulate business and IT-related policies and strategies. Likewise, it allows policymakers, governments and vendors to address important issues at the national level as well as to respond to the needs of partners and stakeholders in other countries. It also offers current and future

academic scholars a grounded understanding of the international IT environment and provides a sound foundation to launch many international IT studies. With the political and social changes taking place in Eastern Europe combined with the changes in Western European markets and Japanese global marketing strategies, American corporations now can utilize information technology as the ultimate weapon in reshaping/expanding their global marketing strategies. Today, global information technology is not just a set of tools for computing, but rather is viewed as a strategic tool to bring organizations growth and prosperity. The Global Issues of Information Technology Management is the right source for discovering untapped potential of your information technology. It is a global tool for the growth and prosperity of your organization. Global ethics focuses on the most pressing contemporary ethical issues - poverty, global trade, terrorism, torture, pollution, climate change and the management of scarce resources. It draws on moral and political philosophy, political and social science, empirical research, and real-world policy and activism. The Routledge Handbook of Global Ethics is an outstanding reference source to the key topics, problems and debates in this exciting subject, presenting an authoritative overview of the most significant issues and ideas in global ethics. The 31 chapters by a team of international contributors are structured into six key parts: normative theory conflict and violence poverty and development economic justice bioethics and health justice environment and climate ethics. Covering the

theoretical and practical aspects of global ethics as well as policy, The Routledge Handbook of Philosophy of Global Ethics provides a benchmark for the study of global ethics to date, as well as outlining future developments. It will prove an invaluable reference for policy-makers, and is essential reading for students and researchers in philosophy, international relations, political science, environmental and development studies and human rights law. Global Issues, Local Arguments: Readings for Writing features high-interest arguments on significant global issues and emphasizes their connection to students' lives-all the while developing critical thinking, rhetorical, analysis, synthesis, argumentation, and research skills. The first argument reader of its kind, Global Issues, Local Arguments: Readings for Writing provides an introduction to analyzing and writing arguments and explores oppositional and nuanced points of view on issues pertaining to globalization: Free Trade, Immigration, Water Rights, Alternative Energy Resources, Culture, Social Media, Human Rights, and Global Pandemics. Students are asked to make connections between local actions and global issues so that they start to understand how writing can be a tool for learning and an agent of change-relevant and effective both inside and outside of academe. Conscientious, specific, and plentiful pedagogy introduces each issue, follows each reading, and concludes each chapter, continually asking students to break down and compare rhetorical argument strategies in use. Thoughtful writing prompts build from brief, informal writing assignments toward more comprehensive and formal rhetorical

analyses and researched arguments. Bringing together interconnected discussions to make explicit the complexity of the Arctic region, this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national, regional and international level. One of the intrinsic features of the region is the difficulty in the determination of boundaries, responsibilities and interests. Against this background, sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and, at the same time, influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region. This perspective lays the ground for further discussion, revolving around the main clusters of governance (focusing on the Arctic Council and the European Union, with the particular roles and interest of Arctic and non-Arctic states, and the impact on indigenous populations), environment (including the relevance of national regulatory schemes, and the intertwinement with concerns related to energy, or migration), strategy (concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors, and covering security and climate change related challenges). This collection provides an avenue for parallel and converging research of complex realities from different disciplines, through the expertise of scholars from different latitudes. This book assembles experiences acquired

with sustainable forest and tree resource management partnerships in various Latin American countries. It addresses the question of which conditions are necessary for partnerships to stimulate sustainable, socially just and pro-poor governance of forest resources. Ambassador (Dr.) Robin Renee Sanders new book on The Rise of Africas Small & Medium Size Enterprises (SMEs) is an insightful examination of the dramatic shift in the development paradigm for Sub Saharan Africa driven in large part by the imaginative, innovative, and insta-impact leadership of the regions small businesses or SMEs. SMEs have helped drive economic development, growth and aided in increasing the size of the Continents middle class, Sanders says. With the Introduction to the book by renown civil rights leader Ambassador Andrew Young, and the Foreword by Sub Saharan Africas leading businessman, Mr. Aliko Dangote, Sanders book credits the determination of Africa SMEs and entrepreneurs (which includes African nationals, immigrants and African Americans) for stepping into the void left by 40-years of post-independence development approaches that had little impact on reducing overall poverty and creating jobs in the region. Africas dynamic entrepreneurial spirit of Generation-Xers and Millennials are and have formed SMEs and social enterprises that today are responsible for conceiving and inventing many of the new apps, and answers to address the regions age-old poverty issues, Sanders emphasizes. Africa SMEs are not only a key driver for jobs, but serve as an additional catalyst to grow the middle class. Sanders argues that it was the Rise of the

Africa SME converging with technology and its mobility that has changed, over the last decade, the focus and direction of development in Sub Saharan Africa. The book has a few vignettes from Sanders diplomatic life and work as CEO of the FEEEDS Advocacy Initiative with Africa SMEs over the years, as well as regional examples of some of innovative things Africa entrepreneurs are doing in sectors ranging from agriculture and food security to energy and climate change. The book also walks readers through what donors, foundations and African stock markets are doing today to help in the SME space. Sanders ends with recommendations of what more can be done by donors, African governments, and the new U.S. administration to further assist Africa SMEs, particularly the group she calls the critical mass, and those at the fragile end of Africas middle class.

Science, Technology and Global Problems documents the proceedings of the International Symposium on Trends and Perspectives in Development of Science and Technology and their Impact on the Solution of Contemporary Global Problems held in Tallinn, USSR on January 8-12, 1979. This compilation discusses the character of global problems in the year 2000, prospects of development of leading branches of science and technology, and its capacity to solve global problems. The topics include global problems in the year 2000 and the role of science in their solution; science and technology as factors for future global development; road to scientific-technological culture; and responsibility of scientists in the period of crisis. The energy situation in the world (problems and prospects); mathematics and

progress in science and technology; role of information and communication in the solution of global problems; and global public health problems and ways of resolving them are also deliberated in this text. This book is a useful source for students and researchers conducting work on the development of science and technology in solving global problems. International Management: Managing Cultural Diversity International Management explores the dynamic global environment of business management by examining the political, legal, technological, competitive, and cultural factors that shape corporations worldwide. With its hallmark clear and concise approach, International Management places fundamental management theories in an international context. Students will gain a comprehensive understanding of the practices, cultural skills and sensitivities needed to operate successfully in a wide range of cross-national situations. The second Australian edition of International Management focuses on the expanding economics of Australasia, China, India and their increasing trade amongst themselves, the European Union and the Americas. International Management 2nd edition incorporates up-to-date research, increased coverage of ethics, a wide range of case studies and examines recent trends affecting international business managers in today's hypercompetitive global environment. International Management is suitable for undergraduate and post graduate students majoring in international business, general management or cross cultural studies. Written by award-winning CQ Researcher journalists,

this collection of non-partisan reports offers an in-depth examination of today's most pressing global issues. With reports ranging from rising sea levels, to global population pressures, to the Israeli-Palestinian conflict, the 2019 Edition of Global Issues promotes in-depth discussion, facilitates further research, and helps readers formulate their own positions on crucial global issues. And because it's CQ Researcher, the reports are expertly researched and written, presenting readers with all sides of an issue. Key Features Chapters follow a consistent organization, beginning with a summary of the issue, then exploring a number of key questions around the issue, next offering background to put the issue into current context, and concluding with a look ahead. A pro/con debate box in every chapter offers readers the opportunity to critically analyze and discuss the issues by exploring a debate between two experts in the field. All issues include a chronology, a bibliography, photos, charts, and figures to offer readers a more complete picture of the issue at hand. Conventions, Treaties and other Responses to Global Issues is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. This theme Conventions, Treaties and other Responses to Global Issues deals with the issue of international resource regimes. These are formal responses by states to the threats posed by trans-boundary pollution or the distribution of resources. In the past thirty years the number of international environmental agreements has steadily risen to reach record

numbers and these agreements have secured a firm place in the hierarchy of international affairs. There is a loose assumption that this is a good thing and that this rise has resulted in a commensurable improvement in environmental protection and resource allocation. But is this actually the case? In fact, is there a positive correlation at all? Or are there negative correlations? What are the connections between environmental diplomacy and environmental protection and how can environmental protection be achieved? These are just a few of the questions that will be addressed in this theme, whilst at the same time giving an overview of the most important international resource regimes and the most influential international organizations having an environmental impact. The theme takes the following shape: the first section introduces issues of international environmental law and its history, showing that international law can take many different forms. Here we explain what policy tools states have in drafting responses to global environmental issues. The second section deals with the most prominent international environmental agreements and gives a state of the art overview of existing regimes. The third and last section of this theme introduces the key actors in the international arena besides states, such as international organizations and civil society actors, such as pressure groups. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs. In East Asia, higher education has relied heavily on

private and marketized forces in its rapid development process. At the same time, state governments have introduced strong initiatives especially in upgrading the global positioning of their flagship universities through their pursuit of international competitiveness. Currently, these well-known characteristics of East Asian higher education are challenged by the necessity to formulate international dimensions for regional and global well-being, without a clear consensus as to a regional future vision. The changing roles of East Asian higher education in a new global environment have implications for academics and policy-makers who not only wish but also need to understand the most recent developments and future prospects of higher education from an East Asian point of view. In Emerging International Dimensions in East Asian Higher Education, authors from a wide variety of cultural and academic backgrounds examine the changing context of East Asian higher education in the global, regional, and national dimensions. The analysis and case study material in this volume are strengthened by the wealth of contributors' diverse national and professional backgrounds. Most have practical experience in the formulation of higher education policy in two or more countries. The range of disciplinary perspectives that contributors brought to the book – including sociology, political science, anthropology, economics, philosophy and history – strengthen the multi-disciplinary approach, credibility, and uniqueness of the work. Each chapter considers the impact of the emergence of international dimensions in East Asian Higher Education through detailed

consideration of trends and debates over higher education reforms at the regional, sub-regional, inter-regional and national levels. Issues such as student mobility, cross-border higher education programs, quality assurance, and demands from the market economy, among others, are examined. Now reorganized and updated throughout, the fifth edition of this well-regarded introductory global issues text continues to reflect the most important aspects of an increasingly globalized world.

Reorganized into more accessible chapters better suited to semester-long courses, with new sections covering development, climate change, pollution, and governance The only survey-level text in the field to unite the perspectives of geography, political science, sociology, ecology, international relations, economics, and development studies Moves beyond the international to be truly global in focus, with coverage of topics such as wealth and poverty, population, food, energy, natural resources, and technology Incorporates new case studies and examples, including the Fukushima nuclear disaster, the effects of changing water supply on migration, natural gas fracking, and smart grid technology Offers a dynamic and accessible narrative with many student-friendly features, such as chapter boxes, a glossary of terms, guides to further reading, media and Internet resources Discover up-to-date related news articles for inspiring discussion and research at <https://www.facebook.com/GlobalIssuesHiteSeitz>. After World War II the United Nations set up a number of special conferences to deal with new problems in international

diplomacy which had arisen. This looks at the significance of these conferences and the implications of the changes for the effectiveness of the United Nations framework. In this three-volume set, an international team of experts involved in the research, management, and mitigation of hate-motivated violence examines and explains hate crimes in the United States and around the globe, drawing comparisons between countries as well as between hate crimes overall and domestic terrorism. • Examines the motivation, actions, and thinking of individuals who commit hate crimes, the effects on victims and society as a whole, and the national and international debates on punishments • Offers guidelines to educate about hate crimes and to serve at-risk populations • Includes vignettes from both perpetrators and victims as well as psychological profiles of hate crime offenders that serve to bring the academic discussions to life • Represents an ideal resource for academic libraries that will be of interest to those studying subjects ranging from sociology to ethnic studies and from law to international studies

It treats education, supported by high standards, approaches, methodologies, and resources, as essential in exploring the interactions of the world's human and environmental systems at local, regional, and global scales embedded in the nature of the discipline of geography. It covers topics such as climate change, sustainable development goals, geopolitics in an uncertain world, global crisis, and population flows, which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies. Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K-12 education in significant countries around the globe. The book discusses factors such as the Internet, social media, virtual globes and other technological developments that provide insights into and visualization – in real time – of the intensity of relationships between different

countries and regions of the earth. It also examines how this does not always lead to empathy with other political, cultural, social and religious values: terrorism threats and armed conflicts are also essential features of the global world. This book opens the dialogue for global understanding as a great opportunity for teachers, educators, scholars and policy makers to better equip students and future citizens to deal with global issues. The world scenario today is changing at a fast pace. The present era is the era of new thinking and new behavior. For the entire world, this is an age of transition. This phase of transition in human behavior, social-cultural setup, political thinking and environmental changes is having a profound impact on the contemporary global scenario. Human thinking, activity and behavior are affected by a number of economic, social, political, physical, technological and human forces. New issues related to the environment, society, culture, economy and political setup are emerging. There is a necessity for all the scholars, thinkers and scientists to work on these newly emerging issues and problems. The book entitled "Contemporary Global Issues and Challenges" is a small literary effort towards these contemporary global issues. The book consists of 31 articles on various global issues. The book throws light on various socio-economic and environmental aspects like deforestation, global warming, pollution, degradation in coral ecosystem, soil pollution, waste management, cultural pollution, terrorism, dalits and globalization, social justice and law, use of remote sensing, impact of COVID-19, space research etc. Each article is a

serious effort to understand the multi dimensions of each issue and problem. We, the editors are very thankful towards the authors and contributors of this book. Articles included in this book are the example of their creative thinking and writing. For readers, we tried our best to convey the ideas and thoughts of our contributors in their original format. We express our gratitude towards our staff members and colleagues for their valuable contribution and suggestions. We are also thankful towards Mr. Rajdeep Sharma of Sunrise Publishers, Jaipur for their nice composing and printing work. Dedicated to Maa Sarasvati and respected teachers. This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education (ICME-13) and is based on the presentations given at the 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 brought together about 3.500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state-of-the-art of the discussions on mathematics education and display the breadth

and deepness of current research on mathematical teaching-and-learning processes. The book introduces the major activities of ICME-13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME-13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups, which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME-13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings. Written by 27 World Bank experts, this book draws on the Bank's unique global capabilities and experience to promote an understanding of key global issues that cannot be solved by any one nation alone in an increasingly interconnected world. It describes the forces that are shaping public and private action to address these issues and highlights the Bank's own work in these areas. Covering four broad themes (global economy, global human development, global environment, and global governance), this

comprehensive volume provides an introduction to today's most pressing global issues -- from pove. Globalization is pushing to the fore a wide variety of global problems that demand urgent policy attention. Managing Global Issues provides a comprehensive comparative assessment of international efforts to manage global problems. It identifies and explains successes and failures of such efforts, examines the roles of different actors, and outlines lessons that may guide future action by governments, international organizations, nongovernmental organizations, and the private sector. The volume's 16 case studies examine organized crime, drugs, corruption, human rights, labor rights, health, trade, financial markets, development assistance, the environment, the global commons, communications, weapons of mass destruction, conventional weapons, internal conflicts, and refugees. Managing Global Issues is the result of an international multidisciplinary research team composed of experts in specific global issue areas. The book's broad scope, numerous case studies and its rigorous comparative analytical framework offers a unique and valuable contribution to the rapidly growing literature on global governance. Contributors include Vinod K. Aggarwal (University of California, Berkeley), Thomas Bernauer (University of Zürich), William Drake (Carnegie Endowment), Octavio Gómez-Dantés (National Institute of Public Health, Mexico), Catherine Gwin (World Bank), Peter M. Shelton (Notre Dame Law School), Timothy D. Sisk (University of Denver), Joanna Spear (King's College, London), and Phil Williams (University of Pittsburgh). This collection highlights six main aspects of global issues in business and organization studies, including the digital side of governmental processes. It also explores wellbeing at work through the development of a questionnaire as an alternative to the impractical wellbeing model. In addition, the volume analyzes the organizational behavior of ISIS and offers insights into secrecy by analyzing several scenes from John Grisham's *The Firm*. The collection then considers marketing innovations in the context of global markets and presents sustainability in the global food industry. The volume serves to demonstrate a number of factors that can have an effect on organization processes and business operations. A selected compilation of writings by IUFOST organization supporters, *Global Themes in Food Science and Technology* were those identified as representing the most important and relevant subjects facing food scientists and technologists today. Chosen by an international editorial board, these subjects offer insights into current research and developments and were selected to stimulate additional interest and work in these key areas. The International Union of Food Science and Technology (IUFOST) is a country-membership organization is the sole global food science and technology*

organization. It is a voluntary, non-profit association of national food science organizations linking the world's best food scientists and technologists. The goals of their work include the international exchange of scientific and technical information, support of international food science and technology progress, the stimulation of appropriate education and training in these areas, and the fostering of professionalism and professional organization within the food science and technology community.

**The latest insights into the topics of greatest concern to today's food science and technology professionals *Written by an international group of academic and professional peers, based on select presentations at IUFOST meeting This lively collection of 12 contemporary articles covers core debates within the broad topic globalization and inspires students to think critically and analytically about issues that impact their lives. This reader is distinguished by its particular focus on up-to-date policy concerns and legal implications of the topics discussed. Unlike more traditional readers, Global Issues exposes students to a journalistic approach to controversial sociological topics, inviting them to consider and debate the real-world relevance of course concepts.*
