Each consumer now has the power to be a journalist, reviewer, and whistle blower. The prevalence of social media has made it possible to alter a brand's reputation with a single viral post, or spark a political movement with a hashtag. This new landscape requires a strategic plasticity and careful consideration of how the public will react to an organization's actions. Participation in social media is mandatory for a brand's success in this highly competitive online era. Managing Public Relations and Brand Image through Social Media provides the latest research and theoretical framework necessary to find ease in the shifting public relations and reputation management worlds. It provides an overview of the tools and skills necessary to deftly sidestep public affronts and to effectively use online outlets to enhance an organization's visibility and reputation. This publication targets policy makers, website developers, students and educators of public relations, PR and advertising professionals, and organizations who wish to better understand the effects of social media. This book provides a holistic perspective on Digital Twin (DT) technologies, and presents cutting-edge research in the field. It assesses the opportunities that DT can offer for smart cities, and covers the requirements for ensuring secure, safe and sustainable smart cities. Further, the book demonstrates that DT and its benefits with regard to: data visualisation, real-time data analytics, and learning leading to improved confidence in decision making; reasoning, monitoring and warning to support accurate diagnostics and prognostics; acting using edge control and what-if analysis; and connection with back-end business applications hold significant potential for applications in smart cities, by employing a wide range of sensory and data-acquisition systems in various parts of the urban infrastructure. The contributing authors reveal how and why DT technologies that are used for monitoring, visualising, diagnosing and predicting in real-time are vital to cities' sustainability and efficiency. The concepts outlined in the book represents a city together with all of its infrastructure elements, which communicate with each other in a complex manner. Moreover, securing Internet of Things (IoT) which is one of the key enablers of DT's is discussed in details and from various perspectives. The book offers an outstanding reference guide for practitioners and researchers in manufacturing, operations research and communications, who are considering digitising some of their assets and related services. It is also a valuable asset for graduate students and academics who are looking to identify research gaps and develop their own proposals for further research. Reappraising Modern Indian Thought: Themes and Thinkers is a lucid and comprehensive account of the thread of socio-political thought of major Indian thinkers over the decades. Varun loves Afreen and wants to marry her but due to differences in their religious, he cannot. Afreen gives in to pressure and gets married to a boy from her community but her husband does not treat her well. He does not even bother when their son is admitted to a hospital and dies. Afreen goes back home to her parents house and starts teaching in a college along with charity work. Varun is not aware of what has happened to Afreen till she retires from college. Varun brings her to his house and takes care of everything including medication. When Afreen dies ,he follows all Hindu rituals and finally buries

her in the Islamic tradition. After some time Varun also dies remembering Afreen and he is cremated by Afreen's brother as per Hindu tradition. This is the end of the story which has not died a natural death but has been killed by customs of fanatics from both Islamic community and hard line Hinduism.
