Since the discovery of the cluster soft excess (CSE) over eight years ago, its properties and origin have been the subject of debate. With the recent launch of new missions such as XMM-Newton and FUSE, we are beginning to answer some of the complex issues regarding the phenomenon. This conference proceedings is an attempt to bring together the latest research results and covers both observational and theoretical work on the CSE and related topics. One of the main topics is the possible relationship between the CSE and the warm-hot intergalactic medium (WHIM), which is believed to harbor 50% of the baryons in the near Universe. New data from both XMM-Newton and FUSE have indicated a possible causal link between the WHIM and CSE. Evidence is based on the apparent detection of O VII emission lines in the soft excess spectrum of the outskirts of several clusters, as well as reports of absorption lines at local and higher redshifts (seen in the spectra of distant sources) as signature of the WHIM. However, while there has

been considerable optimism in attributing a substantial fraction of the cluster soft excess flux to WHIM emission, other work shows that, for example, the amount of WHIM material predicted by theoretical simulations falls way short of that necessary to account for the CSE. Other work indicates that at the cores of some cluster this excess emission is so strong, it is impossible to invoke the thermal model without at the same time enlisting radically new physics. Thus alternative interpretations involving non-thermal processes are also reported and being pursued in earnest. Whatever the origin of CSE may turn out to be, results in this book show that it has become beyond reasonable doubt that the phenomenon itself is observationally established. This book reports the scientific progress made by bringing together scientists from a wide range of disciplines. It clearly demonstrates the importance of such meetings and participants if we are to solve this puzzle. This volume is aimed at scientists and graduate students in astronomy who want to learn about the latest results on cluster soft excess observations and theoretical implications. Parker Duncan has sworn off love and forever since she discovered her wife—her ex-wife—cheating on her on their tenth anniversary. Sydney Hyatt doesn't even do overnight. She attracts women effortlessly, then discards them after an hour or two of mutual pleasure. They meet at a party celebrating Parker's divorce, and they're tailor-made for a no-strings encounter. Yet when their paths cross again, lightning strikes, and both women begin to question their life rules in the face of undeniable passion and growing love. But demons past

and dangers present threaten the lovers, and Parker and Sydney must fight to find new traditions in dark spaces as they cling to the relationship neither of them thought she wanted. The first book in the Lightning series. East Asia, until recently the scene of widespread blood-letting, has achieved relative peace. A region that at the height of the Cold War had accounted for around eighty percent of the world's mass atrocities has experienced such a decline in violence that by 2015 it accounted for less than five percent. This book explains East Asia's 'other' miracle and asks whether it is merely a temporary blip in the historical cycle or the dawning of a new, and more peaceful, era for the region. It argues that the decline of mass atrocities in East Asia resulted from four interconnected factors: the consolidation of states and emergence of responsible sovereigns; the prioritization of economic development through trade; the development of norms and habits of multilateralism, and transformations in the practice of power politics. Particular attention is paid to North Korea and Myanmar, countries whose experience has bucked regional trends largely because these states have not succeeded in consolidating themselves to the point where they no longer depend on violence to survive. Although the region faces several significant future challenges, this book argues that the much reduced incidence of mass atrocities in East Asia is likely to be sustained into the foreseeable future. The AACR Annual Meeting highlights the best cancer science and medicine from institutions all over the world. Attendees are invited to stretch their boundaries, form

collaborations, attend sessions outside their own areas of expertise, and learn how to apply exciting new concepts, tools, and techniques to their own research. Part A contains abstracts 1-3062 accepted for the 2017 meeting. 2 Best-sellers in 1 book! Everything you need to master the English language! Part one of this book includes Preston Lee's Beginner English Lesson 1 – 20 For Vietnamese Speakers. Part two of this book includes Preston Lee's Conversation English Lesson 1 – 20 For Vietnamese Speakers. Have fun and learn English the easy way. This book has been written for all ages, children and adults alike. Preston Lee's Beginner English Lesson 1 – 20 For Vietnamese Speakers. - 20 excellent lessons - 40 fun worksheets for easy learning - Over 40 useful sentence patterns - Practice tests to reinforce learning - Step-by-step grammar development - Frequently used verbs in 4 grammatical forms - 20 practical and commonly used idioms - Vocabulary words include Vietnamese translations Preston Lee's Conversation English Lesson 1 – 20 For Vietnamese Speakers. - 20 excellent lessons for everyday English conversation - Practice tests to reinforce learning - Activity pages for easy learning - Frequently used verbs in 4 grammatical forms - 20 practical and commonly used idioms - Vocabulary words include Vietnamese translations Preston Lee's 2-in-1 Book Series is the absolute best way to learn English. Written by ESL specialists, Kevin Lee and Matthew Preston have taught English as a Second Language for over 20 years around the world. The lessons in this book have been carefully chosen to help the learner really understand a range of topics for everyday

talk. This book series includes everything you need to become an excellent and fluent English speaker! Why is ecofeminism still needed to address the environmental emergencies and challenges of our times? Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment. This book provides a much-needed comprehensive overview of the relevance and value of using eco-feminist theories. It gives a broad coverage of traditional and emerging eco-feminist theories and explores, across a range of chapters, their various contributions and uniquely spans various strands of ecofeminist thinking. The origins of influential eco-feminist theories are discussed including key themes and some of its leading figures (contributors include Erika Cudworth, Greta Gaard, Trish Glazebrook and Niamh Moore), and outlines its influence on how scholars might come to a more generative understanding of the natural environment. The book examines eco-feminism's potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world. This timely volume makes a distinctive scholarly contribution and is a valuable resources for students and academics in the fields of environmentalism, political ecology, sustainability and nature resource management. Learn the procedures and skills you need to succeed as a medical assistant! Clinical Procedures for Medical Assistants, 9th Edition provides clear, step-by-step instructions for common

office procedures such as taking vital signs, collecting and processing lab specimens, preparing patients for examinations, and assisting with office surgeries. Written by expert educator Kathy Bonewit-West, this full-color edition covers the latest competencies and topics in today's medical assisting practice including emergency preparedness and the updated fecal occult blood testing procedure. The Evolve companion website includes videos of 84 procedures described in the book, preparing you to become a competent clinical medical assistant. Over 120 procedures are presented in a clear, illustrated, step-by-step format, with online videos showing 84 of the procedures in action. Chapter outlines and learning objectives prepare you for the skills and concepts you will be learning. What Would You Do? What Would You Not Do? case studies challenge you to apply your knowledge to realistic medical office situations – with a practitioner's response at the end of chapters. Putting It All Into Practice and Memories from Practicum boxes feature real medical assistants sharing personal, on-the-job experiences. Key Terms and Terminology Review help you master medical assisting terminology. Charting examples help you understand the process for charting your own procedures. Patient Teaching boxes prepare you for effective communication, with detailed instructions on how to answer questions and how to explain medical concepts and procedures. Student resources on the Evolve companion website offer a fun way to practice your medical assisting knowledge with animations, games such as Quiz Show and Road to Recovery, drag-and-drop exercises, Apply Your Knowledge exercises, matching exercises, and

other interactive activities (blood pressure readings, determining height and weight, drawing up medication), as well as all video procedures and practicum activities. UPDATED fecal occult blood testing procedure includes new video demonstrating this procedure. UPDATED examples of medical assistants using an EHR are demonstrated in the video procedures, showing the use of electronic charting. Updated venipuncture photos show how to perform venipuncture. UPDATED content also includes topics such as the medical record, including HIPAA, electronic medical records, and advanced directives; emergency preparedness; the use of computer technology; medical asepsis; AIDS & hepatitis; latex glove allergies & non-latex gloves; vital signs including temporal artery thermometer, pulse oximetry, and the significance of pulse pressure; pediatrics including immunization information and IM injection theory; the colonoscopy; IV therapy; and the latest CLIA waived tests. All 84 procedure videos are now available on the Evolve companion website for convenient viewing This book is designed to help English learners begin speaking conversation English. It is also an excellent learning resource for reading and comprehension. Have fun and learn English the easy way. This book has been written for all ages, children and adults alike. - Written for all ages - 40 excellent lessons for everyday English conversation - 40 fun worksheets for review - Practice tests to reinforce learning - Activity pages for easy learning - Frequently used verbs in 4 grammatical forms - 40 practical and commonly used idioms - Vocabulary words include Portuguese translations Written by ESL specialists, Kevin Lee

and Matthew Preston have taught English as a Second Language for over 20 years around the world. The lessons in this book have been carefully chosen to help the learner really understand a range of topics for everyday talk. A great book to be used with Preston Lee's Beginner English 100 Lessons This is an unusual book, combining as it does papers on astrobiology, history of astronomy and sundials, but—after all—Woody Sullivan is an unusual man. In late 2003 I spent two fruitful and enjoyable months in the Astronomy Department at the University of Washington (UW) working on archival material accumulated over the decades by Woody, for a book we will co-author with Jessica Chapman on the early development of Australian astronomy. The only serious intellectual distraction I faced during this period was planning for an IAU colloquium on transits of Venus scheduled for June 2004 in England, where I was down to present the 'Cook' paper. I knew Woody was also interested in transits (and, indeed, anything remotely connected with shadows—see his paper on page 3), and in discussing the Preston meeting with him it transpired that his 60th birthday was timed to occur just one week later. This was where the seed of 'Woodfest' began to germinate. Why not invite friends and colleagues to join Woody in Seattle and celebrate this proud event? I put the idea to Woody and others at UW, they liked it, and 'Woodfest' was born. The history of the "other" Hertzlers is presented for 1750 immigrant Johannes Hertzler who settled in Lancaster County, Pa. Surnames include Breneman, Brubaker, Eby, Funck, Herr, Hershey, Kreider, Newcomer, Paules, Sherrick, Strickler, Weaver, and more.

Index. Berkeley Journal of Religion and Theology, Vol. 2, No. 1. This is the regular issue Journal. Featuring 2015 Distinguished Faculty lecture, the 2016 Readings of the Sacred Texts Lecture, and the 2016 Surjit Singh Lecture, as well as articles by Shin Young Park, Brent Lyons, Wesley Ellis, and Jessica Tinklenberg. Featuring several book reviews as well. This IBM® Redbooks® publication positions the IBM PowerHA® SystemMirror® V6.1 for AIX® Enterprise Edition as the cluster management solution for high availability. This solution enables near-continuous application service and minimizes the impact of planned and unplanned outages. The primary goal of this high-availability solution is to recover operations at a remote location after a system or data center failure, establish or strengthen a business recovery plan, and provide separate recovery location. The IBM PowerHA SystemMirror Enterprise Edition is targeted at multisite high-availability disaster recovery. The objective of this book is to help new and existing PowerHA customers to understand how to plan to accomplish a successful installation and configuration of the PowerHA SystemMirror for AIX Enterprise Edition. This book emphasizes the IBM Power Systems™ strategy to deliver more advanced functional capabilities for business resiliency and to enhance product usability and robustness through deep integration with AIX, affiliated software stack, and storage technologies. PowerHA SystemMirror is designed, developed, integrated, tested, and supported by IBM from top to bottom. The Handbook of Institutional Pharmacy Practice, 4th Edition is a comprehensive resource that provides

both practical and theoretical information on today's pharmacy practices, policies, and teachings. Correlative Light and Electron Microscopy III, Volume 140, a new volume in the Methods in Cell Biology, series continues the legacy of this premier serial with quality chapters authored by leaders in the field. This is the third volume of Methods in Cell Biology covering current Correlative Light and Electron Microscopy (CLEM) methodologies. The field of CLEM is still growing and new combinations of imaging technologies provide exciting new insights. The chapters deal with different approaches to analyze the same specimen by more than one imaging technique to gain more and/or better information over applying each imaging technique separately. The strengths and application area of each presented CLEM approach are highlighted. This volume explores the aspects of sample preparation of diverse biological systems for different CLEM approaches and will serve as a valuable resource to researchers in the field of cell biology. Contains contributions from experts in the field Covered topics include targeted ultramicrotomy and high-precision correlation Presents recent advances and currently applied correlative approaches Gives detailed protocols allowing the application of workflows in one's own laboratory setting Covers CLEM approaches in the context of specific applications Aims to stimulate the use of new combinations of imaging modalities The objective of this book is to report on contemporary trends in the defence research community on trust in teams, including inter- and intra-team trust, multi-agency trust and coalition trust. The book also considers trust in information

and automation, taking a systems view of humans as agents in a multi-agent, socio-technical, community. The different types of trust are usually found to share many of the same emotive, behavioural, cognitive and social constructs, but differ in the degree of importance associated with each of them. Trust in Military Teams is written by defence scientists from the USA, Canada, Australia and the UK, under the auspices of The Transfer Cooperation Programme. It is representative of the latest thinking on trust in teams, and is written for defence researchers, postgraduate students, academics and practitioners in the human factors community. The Routledge Companion to Art and Activism in the Twenty-First Century brings together a wide range of geographical, cultural, historical, and conceptual perspectives in a single volume of new essays that facilitate a deeper understanding of the field of art activism as it stands today and as it looks towards the future. The book is a resource for multiple fields, including art activism, socially engaged art, and contemporary art, that represent the depth and breadth of contemporary activist art worldwide. Contributors highlight predominant lines of inquiry, uncover challenges faced by scholars and practitioners of activist art, and facilitate dialogue that might lead to new directions for research and practice. The editors hope that the volume will incite further conversation and collaboration among the various participants, practitioners, and researchers concerned with the relationship between art and activism. The audience includes scholars and professors of modern and contemporary art, students

in both graduate and upper-level undergraduate programs, as well as artists, curators, and museum professionals. Each chapter can stand on its own, making the companion a flexible resource for students and educators working in art history, museum studies, community practice/socially engaged art, political science, sociology, and ethnic and cultural studies. There is a perceived tension between empirical and theoretical approaches to the study of language. Many recent works in the discipline emphasise that linguistics is an 'empirical science'. This volume argues for a nuanced view, highlighting that theory and practice necessarily and as a matter of fact complement each other in linguistic research. Its contributions — ranging from experimental studies in psychology via linguistic fieldwork and cross-linguistic comparisons to the application of formal and logical approaches to language — exemplify the mutual relationship between empirical and theoretical work. The volume illustrates how selected topics are addressed by different contributions and methodological stances. Topics include the cognitive grounding of language, social cognition and the construction of meaning in interaction, and, closely related, pragmatics from a typological perspective and beyond. Anyone interested in these topics and more generally in meta-theoretical considerations will find great value in this volume. The contents of the October 2015 issue (Volume 125, Number 1) are: Articles • Against Immutability, by Jessica A. Clarke • The President and Immigration Law Redux, by Adam B. Cox & Cristina M. Rodríguez Essay • Which Way To Nudge? Uncovering Preferences in the

Behavioral Age, by Jacob Goldin Note • Saving 60(b)(5): The Future of Institutional Reform Litigation, by Mark Kelley Comment • Interbranch Removal and the Court of Federal Claims: "Agencies in Drag," by James Anglin Flynn Quality ebook formatting includes fully linked footnotes and an active Table of Contents (including linked Contents for all individual Articles, Notes, and Essays), proper Bluebook formatting, and active URLs in footnotes. This is the first issue of academic year 2015-2016. IShelly White is a coding genius who has mastered the IT world but hasn't quite mastered dating. While she searches for Ms. Right with the help of Samantha Monteiro's matchmaking agency, Shelly embraces her inner nerd, and when one of her newest ideas turns into a creative goldmine, she hires PR exec Claire Moseley to help her professional dreams become reality. But is Claire the girl of her dreams in more ways than one? IBeing raised by four brothers has made Claire tenacious. Her assignment to Shelly's high-profile project focuses her desire to prove her worth, even though she secretly fears she's out of her depth. And she absolutely, positively isn't going to let her growing attraction to Shelly White derail her career. IWhen passions and ambitions overlap, Shelly and Claire must decide whether mixing business and pleasure can result in a perfect match. Gorilla Pathology and Health: With a Catalogue of Preserved Materials consists of two cross-referenced parts. The first, the book itself, is a review of pathological changes and tissue responses in gorillas (*Gorilla gorilla* and *G. beringei*), with an emphasis on free-living animals, but also with

reference to those in captivity. The comparative aspects are discussed, stressing the relevance of research to both gorillas and humans. What makes the publication truly unique, however, is the second part, a comprehensive descriptive catalogue of the location and nature of gorilla material in museums and scientific institutions throughout the world. This is of great consequence because free-living gorillas are strictly conserved with restricted access, so the location of a wealth of preserved tissues and other material that has been collected over the decades is a great benefit for research and study. This book can, and should, be used to gain cardinal knowledge regarding the biology and pathology of this genus. The combination of book and catalogue in this extensive compilation makes it an invaluable tool for all those concerned with the health, welfare, and conservation of gorillas, one of our nearest living relatives. Brings together studies, data, and clinical practice from difficult-to-access or obscure journals and NGO reports, in different languages, for all interested parties and practitioners Provides perspectives on existing research in gorilla pathology, both for those studying conservation practices and those seeking an understanding of comparable diseases in humans Includes illustrative figures on gross and microscopic pathological changes, museum specimens, photos of field necropsy and techniques, and examples of laboratory tests Features an extensive list of references and further reading, in different languages Incorporates a comprehensive, descriptive catalogue of gorilla material from around the world Dopo essere stata un'Avenger e un'investigatrice

privata, Jessica Jones inizia un nuovo capitolo della sua vita: l'aspetta un nuovo lavoro in The Pulse, la sezione del Daily Bugle che si occupa di super eroi! Il suo primo incarico la vede indagare su un omicidio commesso da un super criminale, in cui è coinvolto anche Norman Osborn. E anche se le eventuali rivelazioni potrebbero sconvolgere l'intero Universo Marvel, Jessica non è certo il tipo da tirarsi indietro di fronte alle difficoltà... [Contiene The Pulse #1-7]

This authoritative handbook covers all aspects of immunosenescence, with contributions from experts in the research and clinical areas. It examines methods and models for studying immunosenescence; genetics; mechanisms including receptors and signal transduction; clinical relevance in disease states including infections, autoimmunity, cancer, metabolic syndrome, neurodegenerative diseases, frailty and osteoporosis; and much more. Covers receipts and expenditures of appropriations and other funds. A new translation and commentary on I Maccabees that offers a fresh interpretation of the author's values and purpose First Maccabees, composed in the second century BCE, chronicles four decades of clashes between Hellenistic Syria and Judea, from Antiochus Epiphanes's ascent to the throne in 175 BCE to the Hasmoneans' establishment of an independent Judean state, ruled by Simon and his sons. In this volume, Daniel R. Schwartz provides a new translation of the Greek text and analyzes its historical significance. In dialogue with contemporary scholarship, the introduction surveys the work's themes, sources, and transmission, while the commentary addresses textual details and issues of historical reconstruction,

often devoting special attention to the lost Hebrew original and its associations. Schwartz demonstrates that 1 Maccabees, despite its Hebraic biblical style and its survival within the Christian canon, deviates from biblical and Judaic works by marginalizing God, evincing scorn for martyrs, and ascribing to human power and valor crucial historical roles. This all fits its mandate: justification of the Hasmonean dynasty, especially the Simonides.

Forensic Microbiology focuses on newly emerging areas of microbiology relevant to medicolegal and criminal investigations: postmortem changes, establishing cause of death, estimating postmortem interval, and trace evidence analysis. Recent developments in sequencing technology allow researchers, and potentially practitioners, to examine microbial communities at unprecedented resolution and in multidisciplinary contexts. This detailed study of microbes facilitates the development of new forensic tools that use the structure and function of microbial communities as physical evidence. Chapters cover: Experiment design Data analysis Sample preservation The influence of microbes on results from autopsy, toxicology, and histology Decomposition ecology Trace evidence This diverse, rapidly evolving field of study has the potential to provide high quality microbial evidence which can be replicated across laboratories, providing spatial and temporal evidence which could be crucial in a broad range of investigative contexts. This book is intended as a resource for students, microbiologists, investigators, pathologists, and other forensic science professionals. A provocative feminist analysis of

the moral panics of sexuality, this interdisciplinary edited collection showcases the range of historical and contemporary crises we too often suppress, including vagina dentata, vampires, cannibalism, age appropriateness, breast cancer, menstrual panics, and sex education.

FOUR COMPLETE NOVELS—ONE CAPTIVATING WORLD

In the Forests of the Night Three hundred years ago Risika had a family—a brother and a father who loved her. Three hundred years ago she was human. Now she is a vampire, a powerful one. And her past has come back to torment her.

Demon in My View Jessica isn't your average high school student—she's an acclaimed published author of vampire fiction. Now two new students at her high school strongly remind her of her favorite characters. But those characters only live in her imagination—right?

Shattered Mirror Christopher Raneva and Sarah Vida may look like a normal high school couple, but he's actually a vampire who's sworn off human blood and she's an incredibly powerful, vampire-hunting witch. As if that weren't enough to prevent their love, his past and her future collide when they get tangled up with Nikolas, one of the most reviled vampires ever.

Midnight Predator Once a happy teenager, Turquoise Draka is now a vampire hunter. Her current assignment is to assassinate Jeshikah, one of the cruelest vampires in history. But to do that, she'll have to enter Midnight, a fabled vampire realm, as a human slave. . . .

"Practical and accessible, this book provides the first step-by-step guide to cognitive strategy instruction, which has been shown to be one of the most effective instructional techniques for students with learning problems. Presented are

proven strategies that students can use to improve their self-regulated learning, study skills, and performance in specific content areas, including written language, reading, and math. Clear directions for teaching the strategies in the elementary or secondary classroom are accompanied by sample lesson plans and many concrete examples. Enhancing the book's hands-on utility are more than 20 reproducible worksheets and forms"--
