Hues Class 2, Semester 2 Jul 21 2020 1. An integrated semester series for Classes 1 to 5, comprising two semester books for each class. 2. The books are mapped to the National Curriculum Framework. 3. The series focus on developing the 21st century skills of critical thinking, creativity, communication and collaboration through reading texts that are value-centric, as well as activities, exercises and projects that develop life skills along with application and analytical thinking. 4. The subjects included in Classes 1 & 2 (Semester 1 and 2) are English, Mathematics, Environmental Studies (EVS) and General Knowledge 5. The subjects included in Classes 3 to 5 (Semester 1 and 2) are English, Mathematics, Science, Social Studies and General Knowledge

Learners in Japanese Language Classrooms Jan 15 2020 The verbal participation of learners in language classrooms offers a rich seam of data to the applied linguist. Overt and covert participation, when examined, can reveal both the structures of a classroom and elicit privileged information on participant's self-perceptions. It examines the verbal participation of learners in Japanese as a Foreign Language classrooms. Verbal interactions with teachers and classmates and 'private' speech acts are examined in relation to the classroom context and also sociocultural factors such as the learner's motivation and the teacher's belief in their own methods. The examination of corrective feedback episodes and learners' private speech uses recorded speech and stimulated recall interviews recorded over the period of a year. The main focus is on Corrective Feedback episodes, and explains not only the language used in class but also teacher's and learner's own perceptions. It will be of interest to researchers in applied linguistics and second language acquisition, especially those involved with Japanese as a second or other language.

Self-Help to ICSE Semester 2 Topicwise Revision Physics Book Class 10 (Subjective & Objective Format) Oct 16 2022 Just as a guide leads an inquisitive traveller to his goal and while escorting him, narrated the salient features of the object, so does a good guide-book offers the students all the essential information for easy comprehension of the subject to prepare for the Final-Based Examination of Semester-II. 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Physics Class 10th' has been specially written meticulously to contain a comprehensive knowledge of Physics in detail. Its main objective is to prepare the young scholars aspiring for brilliant success in the I.C.S.E. Examination. The material in the text includes chapters incorporating all the divisions of this branch of science. It has been laboriously enriched with the informative summary of each chapter at the outset important points, Expected questions and answers and previous years' questions besides noteworthy suggestions for important questions. The contents of this book have been extensively interspersed with diagrams for accurate practical insight. If studies attentively, 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Physics Class 10th' will greatly help the students in acquiring the fullest knowledge of the subject. It not only inspires you to become budding scientists, scholars and doctors but also helps to sharpen your focus, concentration, creativity and inquisitiveness. The authors feel indebted in their task to the original masters of the subject and their predecessors in the field who as authors have given their most valuable contribution in helping students acquire a robust grip on this branch of science. All new suggestions for further embellishment of this Self-Help will be considered not only useful but will also be highly appreciated and incorporated in subsequent editions.

Modern Approaches for Intelligent Information and Database Systems Apr 17 2020 This book offers a unique blend of reports on both theoretical models and their applications in the area of Intelligent Information and Database Systems. The reports cover a broad range of research topics, including advanced learning techniques, knowledge engineering, Natural Language Processing (NLP), decision support systems, Internet of things (IoT), computer vision, and tools and techniques for Intelligent Information Systems. They are extended versions of papers presented at the ACIDS 2018 conference (10th Asian Conference on Intelligent Information and Database Systems), which was held in Dong Hoi City, Vietnam on 19–21 March 2018. What all researchers and students of computer science need is a state-of-the-art report on the latest trends in their respective areas of interest. Over the years, researchers have proposed increasingly complex theoretical models, which provide the theoretical basis for numerous applications. The applications, in turn, have a profound influence on virtually every aspect of human activities, while also allowing us to validate the underlying theoretical concepts.

Interchange Level 1 Teacher's Edition with Assessment Audio CD/CD-ROM Mar 29 2021 Interchange Fourth Edition is a fully revised edition of Interchange, the world's most successful series for adult and young-adult learners of North American English. The course has been revised to reflect the most recent approaches to language teaching and learning. It remains the innovative series teachers and students have grown to love, while incorporating suggestions from teachers and students all over the world. This edition offers updated content in every unit, grammar practice, and opportunities to develop speaking and listening skills. Interchange Fourth Edition features contemporary topics and a strong focus on both accuracy and fluency. Its successful multi-skills syllabus integrates themes, grammar, functions, vocabulary, and pronunciation. The underlying philosophy of the course remains that language is best learned when it's used for meaningful communication.

Urbanizing the Regional Sector to Strengthen Economy and Business to Recover from Recession Mar 17 2020 This pandemic does not only affect health aspects but also economic aspects. The world today faces a recession resulting from the covid-19 pandemic. Indonesia's economy continues to lead to a recovery, although not very significant. The current government continues to make various recovery efforts. One of the flagship programs includes encouraging and strengthening support for social protection and increasing the purchasing power of households as well as various business sectors, including small and medium-sized micro enterprises (MSMEs). This

condition urges the world to create new breakthroughs to rise from this adversity. Academicians and practitioners need to work together to find the necessary solutions and developments. Surely, it will contribute to solve the problems in society by interdisciplinary cooperation. This collaboration will create innovations in science and technology especially business and economic field. This book includes in-depth discussions between academicians and practitioners, especially on how to strengthen the regional sectors to be the strong pillars of the country's economy. Interestingly, various methods are used to observe the problems, to explore the solutions, and to develop the innovation. This book will be of interest to students, scholars, and practitioners of social empowerment, governance, and other related stakeholders. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons [Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND)] 4.0 license. Funded by State University of Malang.

Electrical Technology Nov 12 2019 The book covers all the aspects of Electrical Technology for undergraduate course. Various concepts of electrical engineering like power and energy measurement, tariff and power factor improvement, illumination, single phase and three phase transformers, single phase and three phase induction motors, alternators, d.c. machines, special purpose motors and solid state speed control of d.c. and a.c. drives are explained in the book with the help of comprehensive approach. The book starts with review of basic concepts of electrical engineering. Then it explains electrical power measurement methods and electrical energy measurement methods. The book also explains types of tariffs and power factor improvement methods. It includes all the details of illumination schemes. The book further explains single phase and three phase transformers. Then book provides the detailed discussion of three phase and single phase induction motors, d.c. generators and motors and synchronous generators. The discussion of special purpose motors such as servomotors, stepper motors and universal motor is also provided in support. Finally, the book incorporates the discussion of various power devices such as power diodes, SCR, DIAC, Triac, IGBT, Power MOSFETs and then continues to discuss the solid state speed control methods for d.c. and a.c. electrical drives. The book uses plain, simple and lucid language to explain each topic. The book provides the logical method of explaining the various complicated topics and stepwise methods to make the understanding easy. The variety of solved examples is the feature of this book. The book explains the philosophy of the subject which makes the understanding of the concepts very clear and makes the subject more interesting.
